What skills are required for each job?

LEAD VET SURGEON—East London

An exciting opportunity has recently become available for a lead vet to join our busy centre in East London.

We are seeking a candidate to help lead this friendly, enthusiastic and dynamic team which consists of two vets, six nurses and three receptionists.

The practice is well equipped with digital X-Rays, ultrasound, in-house bloods, ISTAT and multiparameter units. You will also have access to MRT, CT and laparoscopic surgery.

The position would suit an experienced and ambitious vet who wants to develop their career. The candidate should be medically inclined and a certificate holder. They should also have some management experience.

BUSINESS ANALYST—Bristol

Come work as a business analyst at a growing company that offers great benefits with opportunities to advance and learn alongside accomplished business leaders.

Primary Skills Required

- Experience in requirement analysis
- Min. 3 years experience in transportation industry
- A proven track record in business system analysis

The ideal candidate should have excellent planning, organising, communication and interpersonal skills. They should also be able to demonstrate good presentation skills with the ability to communicate with various audiences, including end users, managers and members of the IT team.

PHOTOGRAPHER—Nottingham

A rare photographer's position has become available at Nottingham Echo Newspapers.

The photographer will work alongside the chief photographer and be expected to consistently produce high quality images for all of our titles.

The candidate for this position must be self-motivated and well organised, with the flexibility to juggle priorities.

The ideal candidate will be NCTJ-qualified, have their own laptop and must be able to edit digital images and transmit them using appropriate technology. In return we offer a competitive salary, digital kit and a company car.

ENGINEER—Thorpe Park

Down tools for an exciting opportunity to work on an island.

If you are a **Skilled Engineer**, we'd love to speak to you, although you won't need to be shipwrecked to wash up on our shores.

You will need a proven knowledge of mechanical engineering with the ability to carry out planned & un-planned safety inspection & maintenance work on amusement devices & associated equipment in accordance with HSG175, plus:

- Ability to read & understand schematic drawings in order to carry out effective fault finding and diagnostics. Experience of working with hydraulic & pneumatic diagrams is essential
- Experience of Health & Safety procedures relevant to engineering activities & the safe handling of heavy equipment
